

Lesson 1: Introduction Exercises

Get familiar with logging in and seeing the user consoles. This lab presumes that the student's computer has already been turned on and logged into a valid account.

Logging in under your assigned User Name and Password

1. Open Internet Explorer.
2. Type in the address: <https://trn.fam.nwcg.gov/yantra/console/login.jsp>
3. Add this address to your Favorites (it may already be there).
4. Enter the Login ID: assigned User Name and Password
5. Enter the Password: assigned User Name and Password
6. Click **Sign In**.

This brings you to the User Console. If you have a problem getting to the User Console, please inform the instructor now.

Otherwise, please take a few minutes to explore the menus across the top of the page.

7. When you are finished exploring click the open door icon (fifth from the left at the top).
 8. On the dialog box, agree that you want to sign out.
